

Title 1 West

West truly believes in the district's Core Value - **All Students Learn**. West staff work hard to ensure all of our students will be proficient in reading by the time they leave West Elementary. Our West Title 1 staff, under the direction of the certified classroom teachers, provides quality core instruction through small group reading and the Guided Reading teaching model. Guided Reading is conducted with a smaller number of students and focuses more on the individual reading needs of each child. During Guided Reading, Title 1 staff and classroom teachers work with students at their instructional level to guide them in using the context, visual, and structure cues within stories to generate meaning. By using instructional level texts that gradually increase in difficulty, students apply strategies in context and feel successful! The end goal, as with any literacy program, is for our students to become confident, proficient readers who **LOVE to read!**

West also provides one on one and/or small group tutoring by our Title 1 staff for students who need additional support in reading and math instruction. This work is also conducted under the direction of the certified classroom teacher.

We believe that the collaborative work of the entire West staff will ensure our students leave West with the skills needed for continued school success.
